Patent No. 6660838
GENERAL INFORMATION:
APPLICANT: Wang, Tongtong
TITLE OF INVENTION: COMPOUNDS AND METHODS FOR THERAPY OF LUNG CANCER
FILE REFERENCE: 210121.455C2
CURRENT APPLICATION NUMBER: US/09/221,107
CURRENT FILING DATE: 1998-12-22
NUMBER OF SEQ ID NOS: 161
SOFTWARE: PatentIn Ver. 2.0

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         9
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence 8,
Sequence 2,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence 28, Application US/09193562D
Patent No. 6309857
GENERAL INFORMATION
APPLICANT: Pauli, Benedicht U.
TITLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium
TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules
FILE REFERENCE: 18617.00540193,562D
CURRENT FILING DATE: 1998-11-17
PRIOR APPLICATION UNDER: US/60/065,922
PRIOR PILING DATE: 1997-11-17
NUMBER OF SEQ ID NOS: 47

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                               432

Sequence 46, Application US/09193562D

Sequence 46, Application US. 6309857

GENERAL INFORMATION:

SETTLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium
TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules
FILE REFERENCE: 18617.0052

CURRENT APPLICATION NUMBER: US/09/193.562D

CURRENT FILING DATE: 1998-11-17

PRIOR APPLICATION NUMBER: US/60/065,922

PRIOR FILING DATE: 1997-11-17

NUMBER OF SEQ ID NOS: 47

US-09-623-624-18

US-09-623-624-18

Sequence 18, Application US/09623624

Patent No. 6576434

THEAD CANT: Magainin Pharmaceuticals, Inc.

TITLE OF INVENTION: Atchma-Associated Factors as:

TITLE OF INVENTION: Atchma-Associated Factors as:

TITLE OF INVENTION: Atchma-Associated Factors as:

TITLE OF INVENTION: Decorders

FILE REFERENCE: 36870-5073-W0

CURRENT APPLICATION NUMBER: US/09/623,624

CURRENT APPLICATION NUMBER: US 08/697,360

PRIOR FILING DATE: 1996-08-23

PRIOR PILING DATE: 1996-08-23

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                      218

US-09-193-562D-34

i Sequence 34, Application US/09193562D

Patent No. 6309857

GENERAL INFORMATION:

AETHIC FAULY: BAULY, Benedicht U.

TITLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

FILE REPERENCE: 18617-0052

CURRENT APPLICATION NUMBER: US/09/193,562D

CURRENT PLING DATE: 1998-11-17

PRIOR FILING DATE: 1998-11-17

PRIOR FILING DATE: 1997-11-17

NUMBER OF SEQ ID NOS: 47

LENGTH: 902
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      AATGGCCTCATTGATGCTTTTTGGGGCCCTTTCATCAGGAAATGGAGCTGTCTCAGCGC

## Sequence 12, Application US/09193562D

## Sequence 12, Application US/09193562D

## GENERAL INFORMATION:

## APPLICATION

## TITLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium

## TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

## TITLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium

## TITLE OF INVENTION: Nucleotide Sequences Channel-Adhesion Molecules

## TITLE OF INVENTION: Nucleotide Sequences

## CURRENT APPLICATION NUMBER: US/09/193,562D

## CURRENT PILING DATE: 1998-11-17

## PRIOR APPLICATION NUMBER: US/06/065,922

## NUMBER OF SEQ ID NOS: 47

## SEQ ID NO 12

## LENGTH: 821

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    509 ProvalAspSerThrvalGlyAsnAspThrPhePheValValThrTrpThrIleGlnLys 528
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence 2. Application US/09193562D

Patent No. 6309857

GENERAL INFORMATION:

AEPLICANT: Pauli, Benedicht U.

TITLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

TITLE TERRESENCE: 18617.0052

CURRENT PAPLICATION NUMBER: US/09/193,562D

CURRENT FILING DATE: 1998-11-17

PRIOR APPLICATION NUMBER: US/60/065,922

NUMBER OF SEQ ID NOS: 47

SEQ ID NO 2

LENGTH: 905
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      68 ATCCAGCTTGAGAGTAAGGGATTAACCCTCCAGAACAGCCAGTGGATGAATGGCACAGTG
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           8 GGCCTCATTGATGCTTTTTGGGGCCCTTTCATCAGGAAATGGAGCTGTCTCTCAGCGCTCC

Sequence 850, Application US/10305720
Publication No. US20040010136A1
GENERAL INFORMATION:
APPLICANT: Au-Young, Janice K.; Seilhamer, Jeffrey J.
TITLE OF INVENTION: Composition for the Detection of Signaling Pathway Gene Expression TITLE OF INVENTION: US/10/305,720
CURRENT FILING DATE: 2002-11-26
PRIOR APPLICATION NUMBER: 09/016,434
PRIOR APPLICATION NUMBER: 09/016,434
PRIOR APPLICATION NUMBER: 1988-01-30
NUMBER OF SEQ ID NOS: 1490
SOFTWARE: PERL Program
SEQ ID NO 850
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ö

Sequence 1056, Application US/09833263

Patent No. US20020110547A1

GENERAL INFORMATION:

APPLICANT: Wand, Aijun

APPLICANT: Stolk, John A.

APPLICANT: Stolk, John A.

TITLE OF INVENTION: CMARCHING FOR IMMUNOTHERAPY AND

TITLE OF INVENTION: DIAGNOSIS OF COLON CANCER AND METHODS FOR THEIR USE

FILE REFERENCE: 21012.471C12

CURRENT FILING DATE: 2001-04-10

NUMBER OF SEQ ID NOS: 1093

SOFTWARE: FASTESEQ for Windows Version 3.0

SEQ ID NO 1056

LENGTH: 3311
